

# BANANA CHIPS

LEVEL

In each column, turn the three-letter word at the top into three different four-letter words by adding a different one of the letters at the bottom to make each word. Place the added letter anywhere in the word (at the beginning, middle, or end), but keep the order of the original tiles the same.

## FACT OR FICTION?

Bananas grow in hanging clusters known as hands. Each hand has between 10 and 20 bananas, which are called fingers.
