

# Tin Foil Easter Egg Art

## Resources:

- cardboard
- scissors
- aluminium foil
- markers

## Instructions:

1. Cut out an egg shape from your cardboard.
2. Tear off a piece of tin foil from your roll. Lay your egg on top of it and then fold the tin foil edges over the egg all over so the front of the egg is completely covered in the foil.
3. Leaving the lid on the marker, use it to draw lines and designs all over the tin foil Easter egg.
4. When you have finished drawing designs, use all of the markers to trace over your designs and add any more details that you like.

The markers look so bright and vibrant against the shiny tin foil. You can choose either the dull or the shiny side of the foil as they both look fab!
